(54) Title: BAG WITH HANDLE

(57) Abstract: A method of forming a bag is provided. The method includes providing an elongate tubular member (22) having opposed ends, at least one end (24) of which defines an open mouth (26). The method further includes folding opposed portions (28, 30, 32, 34) of the tubular member (22) to extend at least partially across the mouth (26). The method also includes positioning a panel (36) to extend across the opposed portions (28, 30, 32, 34). The method further includes securing the panel (36) and the opposed portions (28, 30, 32, 34) together thereby to close the mouth (26) at the at least one end (24) of the tubular member (22).
